

The references below relate to readings I used to develop my understanding of the statistics and quantitative methods that are commonly used across social science research as well as TESOL specific work.

Note: Many of the texts under general research methods also have sections on quantitative methods and statistics.

I have also included a number of books that may be useful for people like myself who are learning about R and programming languages.

General Readings about Statistics and Quantitative Methods

- Al-Hoorie, A. H., & Vitta, J. P. (2019). The seven sins of L2 research: A review of 30 journals' statistical quality and their CiteScore, SJR, SNIP, JCR Impact Factors. *Language Teaching Research*, 23, 727–744.
- Bates, D., Mächler, M., Bolker, B., & Walker, S. (2015). Fitting linear mixed-effects models using lme4. *Journal of Statistical Software*, 67(1), 1-48.
- Bennett, S., & Bowers, D. (1977). *An introduction to multivariate techniques for social and behavioural sciences*. London: Macmillan.
- Bryman, A., & Cramer, D. (1990). *Quantitative data analysis for social scientists*. London: Routledge.
- Borenstein, M., Hedges, L.V., Higgins, J.P.T., & Rothstein, H.R. (2009). *Introduction to meta-analysis*. John Wiley & Sons Ltd.
- Christensen, R.H.B., & Brockhoff, P.B. (2013). Analysis of sensory ratings data with cumulative link models. *Journal de la Societe Francaise de Statistique & Revue de Statistique Appliquee*, 154(3), 58-79.
- Christensen R.H.B (2018). "ordinal—Regression Models for Ordinal Data." R package version 2018.8-25, Retrieved 26.06.2020, from, URL <http://www.cran.r-project.org/package=ordinal/>.
- Cohen, J. (1988). *Statistical power analysis for the behavioral sciences* (2nd ed.). Hillsdale, NJ: Erlbaum.
- Coe, R. (2000). What is an effect size? Durham: CEM Centre, University of Durham. Retrieved from, www.cemcentre.org/ebeuk/research/effectsize/ESbrief.htm
- Davis, C. (2013). *SPSS: Step by step guide: Essentials for social and political science*, Bristol: The Policy Press.
- Effect Size Calculator. (2020). Retrieved from: https://www.psychometrica.de/effect_size.html. Last accessed: 09.05.2020.
- Field, A. (2013). *Discovering statistics using SPSS* (4th edition). London: Sage.
- Gorard, S. (2001). *Quantitative methods in educational research: The role of numbers made easy*. London & New York: Continuum.
- Kirk, R.E. (1999). *Statistics: An introduction*. London: Harcourt Brace.
- Johnson, K. (2008). *Quantitative methods in linguistics*, Malden: MA, Blackwell.
- Li, S., Shintani, N., & Ellis, R. (2012). Doing meta-analysis in SLA: Practices, choices and standards. *Contemporary Foreign Language Studies*, 384(12), 1-17.
- Lipsey, M., & Wilson, D. (2001). *Practical meta-analysis*. Thousand Oaks, CA: Sage.
- Liu, X. (2016). *Applied ordinal logistic regression using Stata*. London: Sage.
- Lowie, W., & Seton, B. (2013). *Essential statistics of Applied Linguistics*. Basingstoke: Palgrave Macmillan.

- Marsden, E., Mackey A., & Plonsky, L. (2016). The IRIS Repository: Advancing research practice and methodology. In A. Mackey & E. Marsden (Eds.), *Advancing methodology and practice: The IRIS Repository of Instruments for Research into Second Languages* (pp. 1-21). New York: Routledge.
- Nathan, L.L., Oswald, F.L., & Nimon, K. (2012). Interpreting multiple linear regression: A guidebook of variable importance. *Practical Assessment, Research and Evaluation*, 17(9).
- O'Connell, A.A. (2006). *Logistic regression models for ordinal response variables*. Sage.
- Pedhazur, E.J. (1997). *Multiple linear regression in behavioural research: Explanation and prediction*. (3rd edition).
- Plonsky, L. (2011). The effectiveness of second language strategy instruction: A meta-analysis. *Language Learning*, 61(4), 993-1038.
- Plonsky, L. (2013). An assessment of designs, analyses and reporting practices in quantitative L2 research. *Studies in Second Language Acquisition*, 35, 655-687.
- Plonsky, L. (2014). Study quality in quantitative L2 research (1990-2010): A methodological synthesis and call for reform. *The Modern Language Journal*, 98(1), 450-470.
- Plonsky, L., & Oswald, F.L. (2014). How big is "big"? Interpreting effect sizes in L2 research. *Language Learning*, 64, 878-891.
- Plonsky, L. and Ziegler, N. (2016) The CALL–SLA interface: Insights from a second-order synthesis. *Language Learning & Technology*, 20(2): 17–37.
- Reinhart, A. (2015). *Statistics done wrong: The woefully complete guide*. San Francisco: No Starch Press.
- Stevens, J.P. (2009). *Applied multivariate statistics for the social sciences*. 5th edition. New York, NY: Routledge.
- Tabachnick, B.G., & Fidell, L.S. (2014). *Using multivariate statistics* (7th edition). Boston: Pearson.
- Viechtbauer, W. (2020). Metafor. Available at: <https://cran.r-project.org/web/packages/metafor/metafor.pdf>. Last accessed: 04.04.2020
- Woodrow, L. (2014). *Writing about quantitative research in applied linguistics*. London: Palgrave Macmillan.

Books for Learning R

- Baayen, H. (2008). *Analysing linguistic data: A practical introduction to statistics using R*. Cambridge: Cambridge University Press.
- Gries, S.Th. (2013). *Statistics for linguists with R: A practical introduction: 2nd revised edition*. Berlin: de Gruyter Mouton.
- Gries, S.Th. (2009). *Statistics for linguistics with R*. Berlin: Mouton de Gruyter.
- Field, A., Miles, J., & Field, Z. (2012). *Discovering statistics using R*. London: Sage.
- Levshina, N. (2015). *How to do linguistics with R: Data exploration and statistical analysis*. Amsterdam/Philadelphia: John Benjamins Publishing Company.
